Marco Island Loop Trail Feasibility Study

The MPO asked FDOT to program and take the lead on conducting the Marco Island Loop Trail Feasibility Study. The Marco Island City Council requested the study.

The purpose of the project is to enhance the regional bicycle and pedestrian network connecting Marco Island to the Shared-Use Nonmotorized (SUN) Trail corridor along US 41 and to improve bicycle and pedestrian safety along SR951 (Collier Blvd.) and CR92 (San Marco Road).
