Existing + Committed (E+C) Roadway Network submitted to FDOT in December. The E+C Network establishes a basis for analysis of future conditions. Committed roads are programmed in the MPO's TIP and/or local governments' Capital Improvement Programs.

2015 and 2045 Socio-economic data submitted to FDOT in January, based on the Bureau of Economic and Business Research (BEBR) medium population projection for 2045 and the County's Interactive Growth Model (IGM) assignments to Transportation Analysis Zones (TAZs).

Next Steps: FDOT's release of its planning model run of the E+C Network with 2045 socio-economic data expected this month. This will identify deficiencies in the E+C Network, which leads us into Network Scenario planning (Phase II) of the LRTP. Stay tuned for interactive surveys and maps!
